TABLE OF CONTENTS

INVITED PAPERS BY TOPIC

I. FORECASTING TECHNOLOGICAL SUBSTITUTION

Organizer/Chair: JACK C. LEE, Bell Communications Research

Forecasting Technological Substitutions with Short Time Series. ELAINE M. KERAMIDAS, JACK C. LEE, Bell Communications Research 1

II. MAKING STATISTICS MORE EFFECTIVE IN SCHOOLS OF BUSINESS

Organizer/Chair: GEORGE C. TIAO, University of Chicago

Making Statistics More Effective in Schools of Business. SAMPRIT CHATTERJEE, AARON TENENBEIN, New York University 11

Making Statistics More Effective in Schools of Business: The Madison Meeting, June 24–25, 1988. ROBERT B. MILLER, University of Wisconsin 14

Systematically Improving the Quality of Statistics Courses: An Invitation. DOUG ZAHN, Florida State University, LAWRENCE A. SHERR, University of Kansas 19

III. INSURANCE CLAIMS: A RANDOM VARIABLE

Organizer: EDWARD W. FREES, University of Wisconsin
Chair: AARON TENENBEIN, New York University

Credibility Models with Time–Varying Trend Components. JOHANNES LEDOLTER, University of Iowa, STUART KLUGMAN, Drake University 22

A Stochastic Model for Non–Life Insurance Claim Incurral, Accrual, and Reporting. JAMES M. ROBINSON, University of Wisconsin 26

IV. MODELING OF NONLINEAR AND NON–GAUSSIAN TIME SERIES

Organizer: ROBERT KOHN, University of New South Wales
Chair: EMANUEL PARZEN, Texas A&M University

Modeling Growth and Decay Curves as Nonlinear Time Series. CRAIG F. ANSLEY, University of Aukland, ROBERT KOHN, University of New South Wales 36

V. STATE SPACE MODELING

Organizer/Chair: WILLIAM WECKER, University of Chicago

State Space Models for Vector–Valued Time Series with Real and Complex Random Walk Components. MASANAO AOKI, University of California, Los Angeles 42

State Space Modeling of Stationary Time Series: Theory and Applications. ARTHUR HAVENNER, University of California, Davis, MASANAO AOKI, University of California, Los Angeles 51

VI. STATISTICAL ANALYSIS IN FINANCIAL APPLICATIONS

Organizer/Chair: PETER A. ZADROZNY, Bureau of the Census

Volatility and the Yield Curve. ROBERT LITTERMAN, JOSE SCHEINKMAN, LAURENCE WEISS, Goldman, Sachs & Company 59

Discussion. DAVID A. HSIEH, University of Chicago 69

A General Class of Specification Tests: The Scalar Case. W.A. BROCK, University of Wisconsin
W. DAVIS DECHERT, University of Houston 70

Discussion. DAVID A. HSIEH, University of Chicago 80

Bispectral Analysis of Trade-by-Trade Stock Prices and the Time of Day Effect. MELVIN J. HINICH,
University of Texas, DOUGLAS M. PATTERSON, Virginia Polytechnic Institute and State University 81

Discussion. DAVID A. HSIEH, University of Chicago 91

VII. DYNAMIC NON-GAUSSIAN AND/OR NON-LINEAR SYSTEMS

Organizer/Chair: JOHN L. MARYAK, Johns Hopkins University

Non-Gaussian Fault Detection and Intervention Analysis in Econometrics. HIROKI TSURUMI,
Rutgers University 92

Some Preliminary Results on Inference and Confidence Intervals in Non-Gaussian State-Space Models.
JAMES C. SPALL, Johns Hopkins University 97

VIII. COMPARING NON-NESTED TIME SERIES/DYNAMIC MODELS

Chair: RUEY S. TSAY, Carnegie Mellon University

The Encompassing Principle for Non-Nested Dynamic Model Specification. HALBERT WHITE,
University of California, San Diego 101

Comparing Not Necessarily Nested Models with the Minimum AIC and the Maximum Kullback-Leibler
Entropy Criteria: New Properties and Connections. DAVID F. FINDLEY, Bureau of the Census 110

Discussion. HIROKI TSURUMI, Rutgers University 119

IX. ESTIMATION IN CHOICE MODELS

Organizer: ALAN E. GELFAND, University of Connecticut
Chair: JOHN ROTONDO, AT&T Bell Laboratories

Nested Multinomial Logistic Choice Models Under Exogenous and Mixed Endogenous-Exogenous
Stratification. GEORGE G. WOODWORTH, University of Iowa, JORDAN J. LOUVIERE,
University of Alberta 121

CONTRIBUTED PAPERS BY TOPIC

I. PROBLEMS IN ALLOCATION AND DISCRIMINANT ANALYSIS

Chair: WILLIAM A. COBERLY, University of Tulsa

A Probabilistic Model in Inventory Distribution Management. KALLAPPA M. KOTI,
Southern Methodist University 130

A Computationally Efficient Algorithm for Variable Selection in Allocatory Discriminant Analysis.
SAMUEL L. SEAMAN, DEAN M. YOUNG, Baylor University 136

Identification of Problem Banks and Binary Choice Models. POURAN ESPAHBODI, Bentley College 142

Linear Programming Based Classification Models for Decision Making. MICHAEL HU,
DOROTHY FISHER, DAVID BOOTH, MING HUNG, Kent State University 148

II. REGRESSION

Chair: PAUL J. SMITH, University of Maryland

Sample Size Requirements for Logistic Regression. JOHN RASP, MARY S. STONE, University of Alabama 152

Truncated Regression Models Under a Monotone Transformation. STEPHEN M. MILLER, Bureau of Labor Statistics 157

A Study of Some Ridge–Type Shrinkage Estimators. ISLAM NOOR, J.S. MEHTA, Temple University 163

Observations on Fuzzy–Linear Regression. H.C. LI, MARTIN ROSENZWEIG, Bryant College 169

III. TIME SERIES METHODOLOGY

Chair: JAMES E. BOZIK, Bureau of the Census

Identifying Structure in Multiple Time Series. PHILLIP N. NORTON, CNA Insurance Companies 174

Testing for Unit Roots. SASTRY G. PANTULA, North Carolina State University 180

IV. QUALITY CONTROL

Chair: NASH J. MONSOUR, Bureau of the Census

Total Quality Programs and Statisticians: The Pluses and Minuses. D.P. BRADY, Union Carbide Corporation 185

The Role of Statistics and Mathematics in the Industrial Revolution. ALEXANDER BATHULA, Montgomery College, MOHAMMAD ABDUL QUASEM, Howard University 186

Quality Assurance Program—PATC. STEPHEN H. COHEN, JOHN MORTON, Bureau of Labor Statistics 191

Robust Time Series Models Applied to Statistical Process Control. DAVID E. BOOTH, WILLIAM ACAR, Kent State University, THOMAS ISENHOUR, Kansas State University, SHARIF AHKAM, Duquesne University 195

Discussion. GLENN D. WHITE, JR., Bureau of the Census 200

Discussion. TIM KRAMER, Center for Quality and Productivity Improvement 203

V. INDEXES, FIRM CLASSIFICATIONS, AND A REVENUE SYSTEM

Chair: JOSEPH GARRETT, Bureau of the Census

Research on Residential Construction Price Indexes. JESSE POLLOCK, DONALD M. LUERY, ARMANDO LEVINSON, Bureau of the Census 206

Statistical Development of the Employment Cost Index. ERIC SCHINDLER, Bureau of Labor Statistics 212

Use and Stability of Classifications of Firms in Oregon's Health Care Industry. THOMAS W. BRUNDAGE, Oregon Office of Health Policy 218

Measurement of and Recent Trends in Canada's Level of Corporate Concentration. WILLIAM KRAUSE, JACK LOTHIAN, Statistics Canada 223

Redesigning Treasury's Revenue Network. ROGER H. BEZDEK, JONATHAN D. JONES, U.S. Treasury Department 229

The Equivalence of Combining Weight Estimates from the Normal Model and from the Granger/Ramanathan's Regression Method B. KUO–YUAN LIANG, National Tsing–Hua University 234

VI. PORTFOLIO CHOICE

Chair: PETER A. ZADROZNY, Bureau of the Census

Methodological Issues in Studies of Skewness Preference. GHASSEM HOMAIFAR, DUANE B. GRADDY, Middle Tennessee State University, BILLY P. HELMS, University of Alabama 237

Investment Horizon and Estimation of Relative Risk Aversion. MARVIN J. KARSON, University of New Hampshire, DAVID C. CHENG, University of Alabama, CHENG F. LEE, University of Illinois 243

Determinants of Changes in Systematic Risk. S.G. BADRINATH, HASSANALI ESPAHBODI, Northeastern University 247

Partially Adaptive Beta Estimation for the Market Model. JAMES B. McDONALD, RAY D. NELSON, Brigham Young University 253

VII. REGRESSION: ERRORS-IN-VARIABLES MODELS & BAYESIAN APPROACHES

Chair: CLIFFORD SPIEGELMAN, Texas A&M University

Reporting the Uncertainty in Regression Coefficients from Errors-in-Variables. JOHN H. HERBERT, KHOAN T. DINH, Energy Information Administration 259

Improved Instrumental Variable Estimation for the Nonlinear Errors-in-Variables Model. YASUO AMEMIYA, Iowa State University 265

A Test for Error Covariance Specification in Nonlinear Measurement Error Models. DANIEL J. SCHNELL, Centers for Disease Control 271

Improving Least Squares Estimates via Empirical Bayes. JAMES P. BOYLE, ROBERT M. HOLMES, JR., Navy Personnel Research and Development Center 276

An Evaluation of a Bayesian Approach to Isolating Sources of Errors in State-Space Models. JAMES T. EVERETT, Johns Hopkins University 280

A Bayesian Test on the Nonstationarity of Regression Parameters Under Heteroscedasticity. DONGCHEOL KIM, University of Michigan 286

VIII. TOPICS IN LINEAR MODELS AND APPLICATIONS

Chair: HOLLY B. SHULMAN, Centers for Disease Control

A Comparison of Models Used to Account for the Cotemporaneous Relationship in a Continuous Variable Panel Model. LAWRENCE S. MAYER, STEVEN S. CARROLL, Arizona State University 291

A Pseudosample Approach to Model Discrimination in Regression Analysis. VICTOR KIPNIS, University of Southern California 297

Combining Prior Information with Ridge Regression. ROBERT H. CROUSE, Central Connecticut State University, R. JAMES HOLZWORTH, University of Connecticut 302

Scaling Corrections for Chi-Square Statistics in Covariance Structure Analysis. ALBERT SATORRA, University of Barcelona, P.M. BENTLER, University of California, Los Angeles 308

Beating the Wagering Line for National Football League Games. BRUCE COOIL, THEODORE DAY, Vanderbilt University and University of North Carolina 314

IX. ANALYSIS OF SEASONAL TIME SERIES

Chair: WILLIAM W. DAVIS, Bureau of the Census

Seasonal BVAR Models. JACQUES RAYNAULD, JEAN-GUY SIMONATO, Ecole des Hautes Etudes Commerciales 319

A Study of the Seasonal Pattern of Futures Price Volatility. SHAW K. CHEN, University of Rhode Island, DAVID J. BROPHY, WILLIAM J. WROBLESKI, University of Michigan 325

Deterministic and Stochastic Models for the Estimation of Trading-Day Variations. ESTELA BEE DAGUM, BENOIT QUENNEVILLE, Statistics Canada 331

On the Use of Intervention Analysis in Seasonal Adjustment. JAMES A. BUSZUWSKI, STUART SCOTT, Bureau of Labor Statistics 337

On the Impact of Centering the Data on the Distribution of the Sample Autocorrelations of a Seasonal Nonstationary Process. ALAIN LATOUR, University of Quebec, Montreal, ROCH ROY, University of Montreal 343

X. ECONOMIC SURVEYS AND AUDITS

Chair: ROGER BUGENHAGEN, Bureau of the Census

An Application of Economics to the Problem of Respondent Burden in Economic Surveys. ARNOLD P. REZNEK, Bureau of the Census 349

Microaggregation and Disclosure Avoidance for Economic Establishment Data. MICHAEL K. WOLF, Bureau of the Census 355

The Industry Wage Survey Program: An Evaluation of the Quality of Program Estimates. PENNY ASBURY, CARL BARSKY, Bureau of Labor Statistics 361

Generalized Variances for the Employee Benefits Survey. LARRY L. HUFF, Bureau of Labor Statistics 366

Edit and Imputation of Tax Data. M. BUREAU, S. MICHAUD, J. KOVAR, Statistics Canada 372

Measuring Geographical Mobility Using Panel Data from the SIPP. REBECCA CLARK, ALDEN SPEARE, JR., Brown University 376

XI. MODELS IN MARKETING

Chair: ROBERT M. WHARTON, Fordham University

A PC–Based Method for Data Entry and Transmission of Multi–Punched (Binary) Datasets. BOB S. HODGES, III, George Washington University 382

Applications of Combinatorial Methods to Conjoint Analysis. ROBERT M. WHARTON, Fordham University, R. SRINIVASAN, Temple University 384

XII. REGRESSION AND FINANCIAL MARKETS

Chair: ANDREW F. SIEGEL, University of Washington

Statistical Evidence of Planned Pricing on the New York Stock Exchange. PURNELL H. BENSON, Cavern Analysis Corporation 389

Inflation and Stock Returns: Evidences Based on Firms' Data. HUI S. CHANG, ANGELA YA–CHIU LIU, University of Tennessee and North Texas State University 394

Statistical Determination of the Optimal Foreign Exchange Hedge Ratio. EDMUND H. MANTELL, Pace University 399

Monetary and Fiscal Policy Effects on Real Interest Rates: Evidence from the 1970s and 1980s. ANANDI P. SAHU, Oakland University 405

Exchange Strategies for International Corporate Finance. BEN UZOARU, Southeast Missouri State University 411

XIII. ECONOMIC MODELING I

Chair: DAVID J. SMYTH, Louisiana State University

U.S. Productivity Growth and Production Functions. HONG V. NGUYEN, University of Scranton 415

Policy Simulations with an Econometric Model for Kuwait. GORTI V.L. NARASIMHAM, Joint Economic Commission U.S.–Saudi Arabia 419

Expectation Schemes and the U.S. Soybean Market. JOHN BAFFES, University of Maryland, TASSOS HANIOTIS, Wye College, JACK E. HOUSTON, University of Georgia 428

Mixing Alternative Single Equation Estimators in a Simultaneous Equations System. K.R. KADIYALA, Purdue University, DENNIS OBERHELMAN, University of South Carolina 433

A Monetary Model of Argentina, Venezuela, and Yugoslavia and Their Related Debt Issues. ABBAS JEAN ROAYAEI, California State University 437

Separate Hypothesis Tests of the Relationship Between Taxes and Money Demand. MARLENE A. SMITH, University of Colorado at Denver, DAVID J. SMYTH, Louisiana State University 443

XIV. LABOR FORCE STATISTICS AND ARBITRATION

Chair: THOMAS J. PLEWES, Bureau of Labor Statistics

The Industrial Scientific Workforce Since World War II. JAMES ADAMS, University of Florida 449

The Hazards of Modelling Survivor Data with Zero Spells: The Case of Advance Notice. PAUL SWAIM, University of Massachusetts 454

Labor Force Transitions of the Newly Unemployed. MICHAEL W. HORRIGAN, Bureau of Labor Statistics 459

Staggered Wage Contracts and Macroeconomic Time Series. ROBIN ROWLEY, RENUKA JAIN, McGill University 464

The Effect of Gender on Salary: A Case Study. GORDON D. JOHNSON, ELZBIETA K. TRYBUS, California State University, Northridge 470

On Managing Telephone Operators in an Optimal Way. TERESA LOPEZ-ALVAREZ, VICTOR AGUIRRE-TORRES, Centro de Investigacion en Matematicas, Mexico 476

XV. ECONOMIC MODELING II

Chair: ARNOLD P. KEZNEK, Bureau of the Census

A Comprehensive Empirical Approach to Impact Assessment: Applications to Service-Oriented Entities. M. RAY PERRYMAN, Baylor University 481

Feedback Production-Inventory Models. B. SARKAR, Indian Institute of Management, Calcutta 485

Robustness to Non-Normality of the Durbin-Watson Test for Autocorrelation. MUKHTAR M. ALI, University of Kentucky, SUBHASH C. SHARMA, Southern Illinois University 487

XVI. TIME SERIES: ANALYSIS AND APPLICATIONS

Chair: BRIAN C. MONSELL, Bureau of the Census

Simultaneous Transfer Function Analysis of Okun's Misery Index: Improvements in the Economic Quality of Life Through Maharishi's Vedic Science and Technology of Consciousness. KENNETH L. CAVANAUGH, Maharishi International University, KURLEIGH D. KING, Central Bank of Barbados 491

An Alternative Method to Produce Prices Received Estimates. W.W. DONALDSON, B.F. KLUGH, JR., U.S. Department of Agriculture 497

Trend-Adjusted Forecasts from Leading Series. MYRON MELNYK, Kent State University 502

ARIMA Models of the Price Level: An Assessment of the Multilevel Adaptive Learning Process in the U.S. PAMI DUA, SUBHASH C. RAY, University of Connecticut 505

XVII. OUTLIERS AND CHANGES OF STRUCTURE

Chair: ANDREW G. BRUCE, University of Washington

An Application of a Kalman Filter for Estimation and Edit. NANCY J. KIRKENDALL, Energy Information Administration 510

Retrospective and Sequential Tests for Shifts in Linear Models with Time Series Regressors and Errors. D.L. HAWKINS, University of Texas, Arlington 516

A Robust Procedure for Detecting Outliers in Time Series. JONG H. LEE, WILLIAM W.S. WEI, Temple University 522

Assessment of Technical Efficiency with Messy and Compromised Data. B.L. SEAVER, K.P. TRIANTIS, University of Tennessee, Virginia Polytechnic Institute and State University 527

Discussion. JOHN M. IRVINE, Washington, D.C. 533

XVIII. STATISTICS IN THE PETROLEUM INDUSTRY

Organizer/Chair: PAUL G. WAKIM, American Petroleum Institute

Multi-Stage Sampling for Evaluation of Natural Gas Pipeline. DANIEL M. REINHART, U.S. Environmental Protection Agency 535

Oil and Grease Discharge Characteristics of Gas Flotation Water Treatment Units. GORDON H. OTTO, University of Houston 539

National Petroleum Council Survey of Storage and Inventory in the Secondary Petroleum Distribution. PAULA WEIR, U.S. Department of Energy 545

Model-Based Estimation for the API Production Waste Survey. PAUL G. WAKIM, American Petroleum Institute 551

XIX. DISTRIBUTIONAL AND LIKELIHOOD METHODS

Chair: BENOIT QUENNEVILLE, Statistics Canada

On Estimating the Scale and Noncentrality Matrices of a Wishart Distribution. KHURSHEED ALAM, Clemson University, AMITAVA MITRA, Auburn University 557

Extreme Value Distribution in Estimation of Insurance Premiums. EDWARD NISSAN, University of Southern Mississippi 562

XX. TIME SERIES METHODS AND MODELS

Chair: JOHANNES LEDOLTER, University of Iowa

Calculation of the Variance of Population Forecasts. WILLIAM W. DAVIS, Bureau of the Census 567

Simultaneous Equations with Generalized Autoregressive Conditional Heteroskedasticity. RICHARD L. HARMON, Georgetown University 573

Detecting Extraneous Forecast Variables by a Limiting Function. ELLIOT LEVY, Reston, Virginia 579

XXI. BAYESIAN MULTIVARIATE AND TIME SERIES ANALYSES

Organizer/Chair: EHSAN S. SOOFI, University of Wisconsin, Milwaukee

Bayesian Contextual Classification of Remotely Sensed Data: An Iterative Procedure. RUBEN KLEIN, IMPA, Brazil, S. JAMES PRESS, University of California, Riverside 585

Bayesian ARMA Forecasting. LYLE D. BROEMELING, University of Texas, PEYTON J. COOK, University of Tulsa 590

XXII. ENERGY STATISTICS

Chair: YAHIA Z. AHMED, Internal Revenue Service

Statistical Analysis Applies to Energy Conservation Programs. H.L. HWANG, Oak Ridge National Laboratory, S.P. MIAOU, University of Tennessee 596

Time-of-Day Preferences Determined from the Second Moments of Behavioral Equations. JOSEPH G. HIRSCHBERG, Southern Methodist University 602

Short Term Electric Load Forecasting Using Linear Regression. TIMOTHY C. HESTERBERG, St. Olaf College, ALEX PAPALEXOPOULOS, Pacific Gas & Electric Company 608

Examination of Error in Energy Data from Electric Utilities. RENEE MILLER, Energy Information Administration, ELIZABETH TITUS, Science Applications International Corporation 613

Does the Random Component Affect Estimation in a Discrete/Continuous Model?
CURTIS K. CHURCH, Middle Tennessee State University 618

CONTRIBUTED PAPERS—POSTER SESSION

An Analysis of Food Spending Patterns: An Empirical Study of Functional Form. LAURA L. BAUER, Federal Reserve System, ORAL CAPPS, JR., Texas A&M University, ERIC P. SMITH, Virginia Polytechic Institute and State University 621

Reducing Prediction Interval Width by Using Modified ARIMA Models. BRUCE BOWERMAN, ANNE KOEHLER, Miami University 627

Cluster Analysis for Establishing Near Optimum Machine Conditions. GARY FELLERS, Augusta College 632

A Needs Survey of Intelligent Buildings in Texas. KRIS MOORE, G.W. WILLIS, Baylor University, RON THOMPSON, CAROLYN PRESCOTT, CORD 636

Estimating Elasticities in Pulp and Paper Industry. FASSIL NEBEBE, DENNIS KIRA, Concordia University 639

Adaptive Three Stage Least Squares. WILLIAM C. QUINN, Laurel, Maryland 645

Bootstrapping a Regional Econometric Model: Oklahoma Unemployment Rate and Individual Income Tax Models. MUN S. SON, HOSNY I. HAMDY, University of Vermont 650

INDEX OF PARTICIPANTS 655
